

LIFELINE

UV Boost™

UV Boost provides an extra measure of protection against stain fading due to UV radiation in regions subject to high intensity sunlight.

For use only in water-based stains & finishes produced by Perma-Chink Systems, Inc.

Net Contents: 240 ml.

Add to five (5) gallons stain or finish

05/04

UV Boost is only effective when used in the first coat of stain or finish applied to bare wood. It is not effective when added to topcoats or stains applied over an existing finish. May be used in both interior and exterior applications.

Directions for Use

Shake container. Add entire contents to a full 5-gallon pail of stain or finish. Shake or stir well after addition. Follow labeled application directions for stain or finish.

DO NOT FREEZE.
